ISM STUDENT DATABASE 2020 SHARING FILES VIA ONEDRIVE IN OUTLOOK

International School of Management (ISM)
University of the Thai Chamber of Commerce

What we did in ISM

- ISM found that we do not have a student database which we can use as a reference. The information is scattered with the staff in charge of their respective job duties and the university central database does not match our usage. Moreover, due to the COVID-19 pandemic situation, we are faced with the problem that our new staff need to work from home. Therefore, ISM administrators have assigned in a meeting that we should establish an ISM Student Database 2020 as our KM for this academic year. Since we have done Standard-Operation-Procedures concerning our student activities work and budget using in the Cloud for our KM in Academic Year 2019 and it was successful, we have continued that practice of information sharing with our staff by using the cloud system in Academic Year 2020.
- Share and exchange information among staff on what kind of information about students are needed by our administrators, our teams and ourselves.
- Create a file with tables of all needed data heads about our students and upload it in the OneDrive of Office 365 for ISM staff to fill their data.
- Test using the shared file by our staff to find out how it works and if there are any missing data.
- Revise the database for the best usage before sharing it to our administrators for their information.
- Inform the staff to use the shared files via messenger app and follow up with them on their experience using it.
- Make a conclusion and post in UTCC KM System and ISM website in the item of Knowledge Management Academic Year 2020 (No students real information can be shown since they are personal data.)

The Problems We Found in ISM about Student Database:

- ISM does not have its own student database.
- ISM uses UTCC data center such as Office of Registrar and Department of Information. That information does not match our usage and we take some time to revise it.
- The information is scattered with the ISM staff in charge of their respective job duties and they are stored in their personal computers. We need to gather information from them each time.
- Computers are in the office so we cannot get the information if we need to work from home during the COVID-19 pandemic situation.

Share and exchange information among staff on what kind of information about students are needed:

The Advantages of Sharing Student Database 2020 File in the OneDrive

- Reduce the time to gather information of student from each staff
- Can be used anywhere with internet access
- Can be used at the same time by many persons
- Can see the other users and know who they are
- Can check the file edition history
- It immediately alerts the creator, if someone cannot open to the file.
- It works very well during our COVID-19 situation while we needed to work from home.

For ISM Members

- ISM student database is important for our work, please keep on sharing it for the following academic years.
- If you have other files that will be useful to the others in our office, you can use this way to share you files instead of using ISM DATA (Server).
- It is also another channel for sharing files among our group in addition to the applications that we are using now.
- For the other files in our Server or any important files, they will be shared via OneDrive later.
